searchByName

The screenshot displays the Postman interface for a REST client. The workspace is named "My Workspace" and the current collection is "api-ibik / Student / Student-Search". The request is a POST to "localhost:8080/api/students/search". The body is a JSON object with a "searchKey" of "ama". The response is a 200 OK status with a response time of 92 ms and a body size of 1.63 KB. The response body is a JSON object with a "result" of true, a "message" of [], and a "data" array containing two student objects.

Request:

```
POST localhost:8080/api/students/search
```

Body:

```
{  "searchKey": "ama"}
```

Response:

```
{  "result": true,  "message": [],  "data": [    {      "id": 4,      "npm": "202310015",      "firstname": "Keisha",      "middlename": "Amalia",      "lastname": "Salsabila",      "programs": {        "programStudy": {          "courses": []        }      }    },    {      "id": 5,      "npm": "202310036",      "firstname": "Amanda",      "middlename": "",      "lastname": "Naila",      "programs": {        "programStudy": {          "courses": []        }      }    }  ]}
```
